1. Installation Step

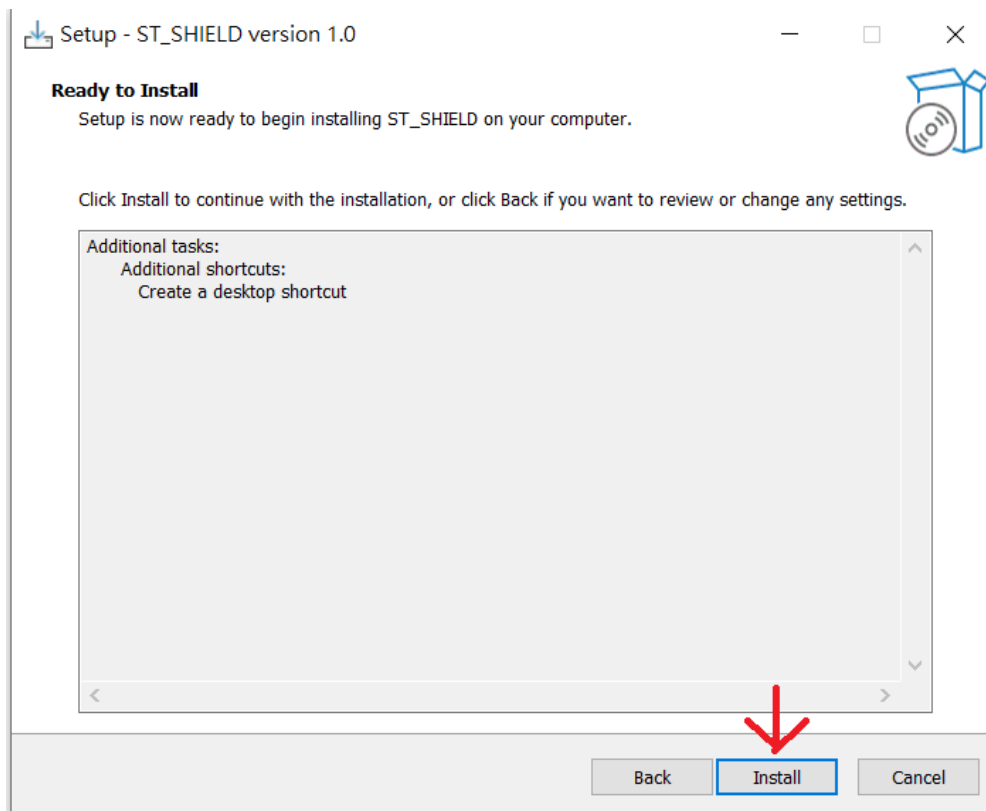

- i. Run installation file “ST_SHIELD_update.exe”

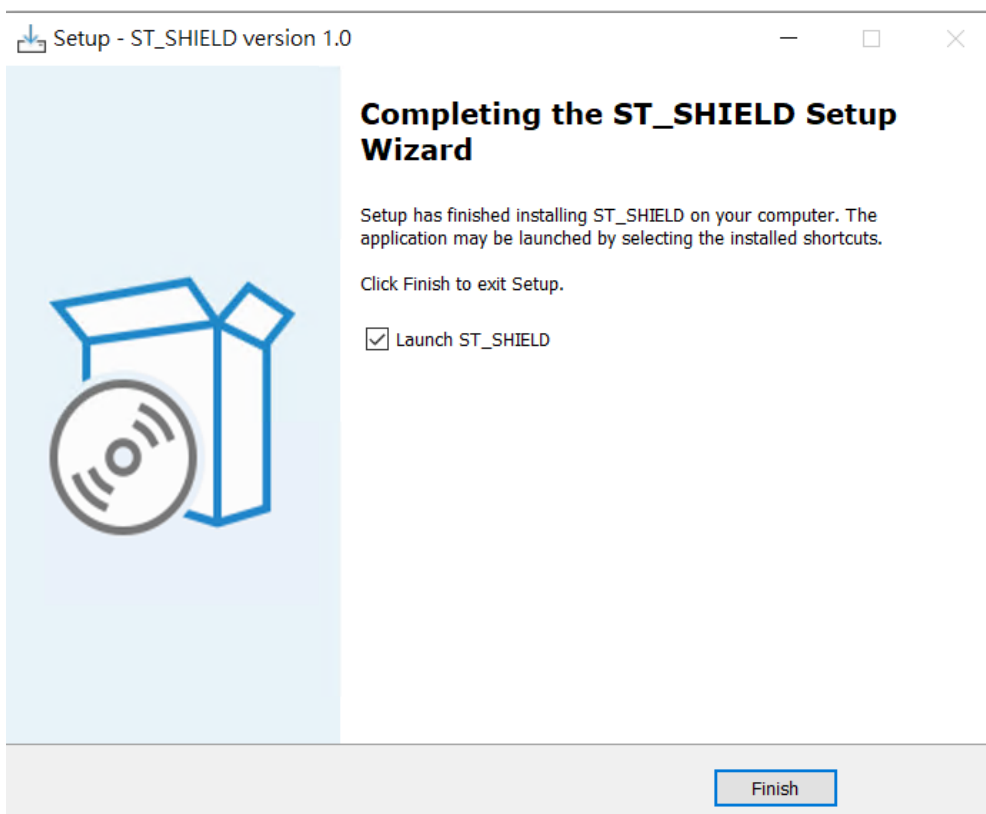

- ii. Create desktop shortcut (optional) and click Next

iii. Click Install

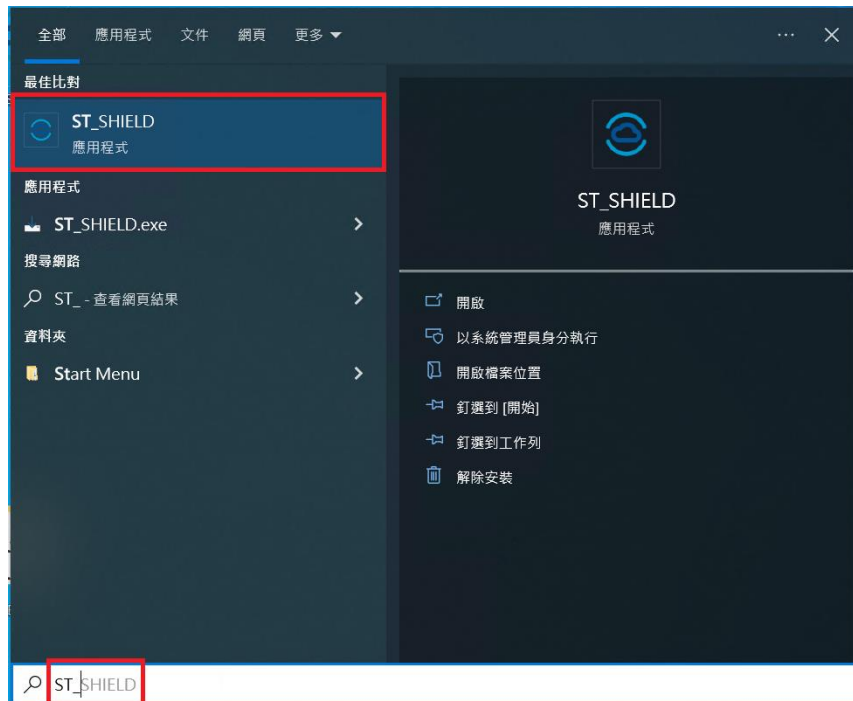

iv. Finish installation

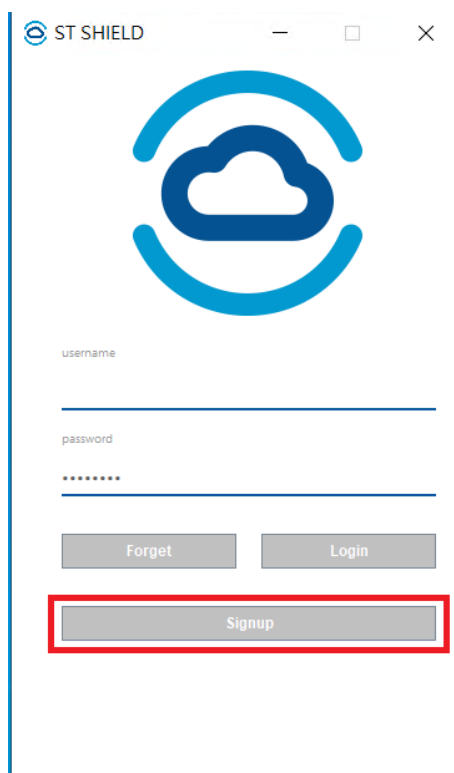

2. Usage

i. Find ST_SHIELD in start menu

ii. Click Signup

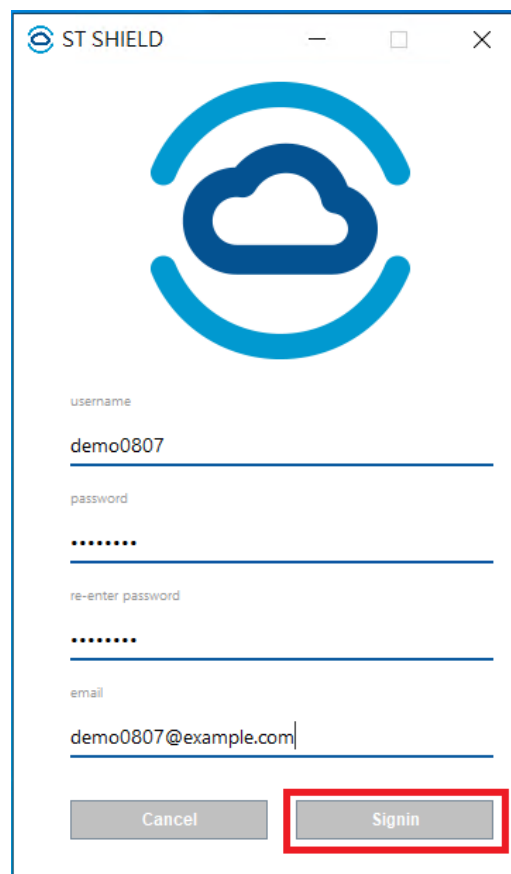

iii. Fill in arbitrary account information

The image shows a window titled "ST SHIELD" with a logo consisting of a blue cloud inside a circle, with two curved lines above and below it. Below the logo is a red rectangular box containing four input fields: "username" with the text "demo0807", "password" with masked characters "*****", "re-enter password" with masked characters "*****", and "email" with the text "demo0807@example.com". Below the input fields are two buttons: "Cancel" and "Signin".

iv. Click Signin

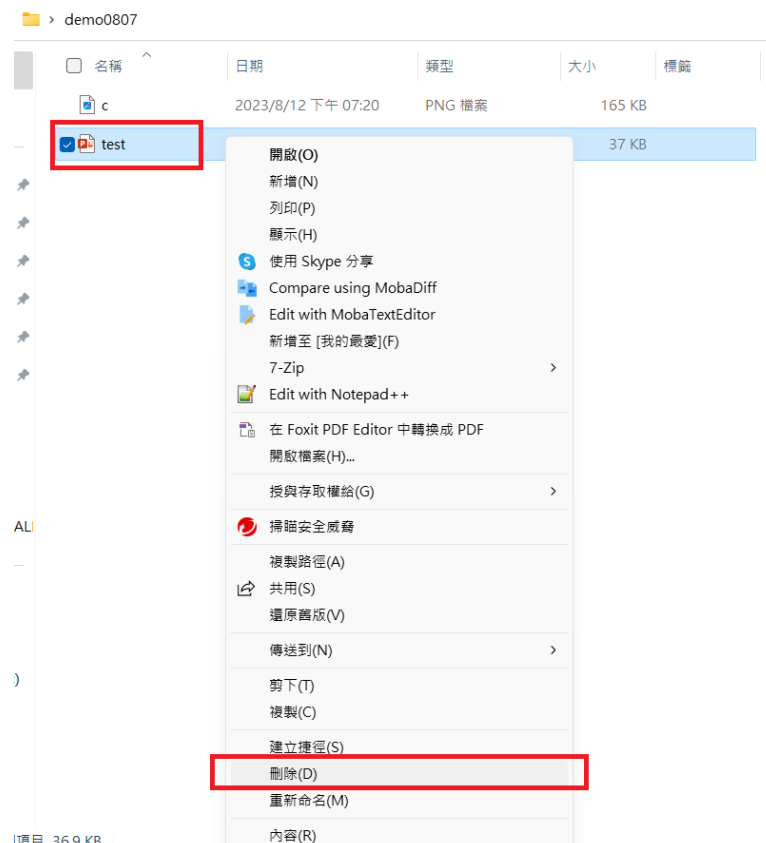

The image shows the same "ST SHIELD" window as in the previous step. The "Signin" button at the bottom right is now highlighted with a red rectangular box. The input fields and their contents remain the same.

v. Shortcut to Protected Folder appears in desktop

Delete a file from protected folder

A confirmation window pops up
